FIND THE EVIDENCE. SOLVE THE CRIME.

Professional Certificate in Crime Scene Investigation

Crime Scene Investigation is the meeting point of science, logic and law. If the idea of tying these three disciplines together intrigues you, make a point to examine the evidence. Popular television shows only tell part of the story of the life of a Crime Scene Investigator (CSI). Either a field or a lab can be their office as they work at collecting and processing evidence, and securing the crime scene. Most CSIs work for a law enforcement agency, crime lab, or coroner's office.

Whether you are preparing to enter the field of crime scene investigation, or you want to improve your current skills and expertise, this program is for you. Each course is taught by a top-notch instructor who uses a hands-on approach. Learn the fundamental theories of physical evidence, and examine the elements of crimes. The curriculum meets the required instructional topics for the Crime Scene Investigator Certification through the International Association for Identification.
